Comments:

3:45 PM - Received a call from Annette Davis with the Alabama EMA regarding an incident which occurred on I-459 S just south of the interstate on-ramp from Overton Access Road in Birmingham, Jefferson County. The incident occurred when an 18-wheeler lost control and hit the concrete side wall. This resulted in the impingement of a saddle tank and oil pan, and the release of approximately 65 gallons of diesel fuel and 8 gallons of diesel oil onto concrete and into the Cahaba River. Weil Wrecker Service provided remediation with Oil-Dri absorbent and boom placement. ADEM was onsite. NRC# 1198910.

Comments:

Received a call from Alabama EMA regarding a railcar carrying 13,000 gallons of sulfuric acid that had split open and lost its entire load at the CSX Boyles Yard located at 2800 Seaboard Road in Birmingham. The acid spill was onto the railbed near the middle of the railyard, with no water impacted. Numerous hazardous response companies were on site conducting cleanup by neutralizing the acid with Portland cement and using backhoes and dumptrucks to remove the affected material. Cleanup activities have been completed. ADEM was on site.

Comments:

Received a call from Angie Smith with the Alabma EMA regarding a train collision occurring at the CSXT - Boyles Terminal off of Seaboard Road in Birmingham, Jefferson County. The incident occurred when two trains collided. The results of this collision was the release of approximately 18,100 gallons of lubration oil onto the ballast of the rail yard. No material was observed in any adjacent waters of the state.

Arcadis Environmental Services was onsite as general environmental consultants for the incident. HEPACO and Marion Environemental, Inc. were onsite to perform source removal and respone activities, including the following: percautionary boom placement in nearby drainage areas and creek outfalls, the construction of two, 6-inch trench drain pipes, and 6 vac trucks in rotation performing continuous oil recovery at the ballast, and the reconaissance of boom and waterways every 3-hours.

As of April 9, 2018, 20,800 gallons of water and product have been recovered. Inspection and recovery events have been scheduled for approximately every-other-day or immediately following storm events. Inspection and recovery events are ongoing.

Comments:

9/29/18 1628- Recieved a call from the Jefferson county EMA about a reported smell of gasoline and a slick contained in a storm drain that leads to Village creek. The release was not ongoing, and the slick was contained within the drain with booms by the fire department. Weil Wrecker was hired to vaccum the open part of the storm drain, and Spectrum environmental was later contracted to rinse the remaining product from the drain opening on the adjacent property. ADEM responded.

11/12/18 1824- Recieved a call from AL EMA about the same location, with a slick on the water in the storm drain and a gas odor. Material was contained with booms in the storm drain from the previous incident. A leak at the Circle K at 1200 Bankhead Hwy W was determined to be the source of the material. PPM is contracted to preform cleanup, incident given to UST. NRC# 1230562.
