City of Birmingham Public Works Department Landfill Division

Waste Stream Certification

The Alabama Department of Environmental Management (ADEM) requires that operators of Sanitary Landfills maintain on file a written certification from permitted landfill users and customers of permitted users who are commercial waste haulers or transporters which certifies that waste delivered to the landfill does not contain any regulated hazardous waste, infectious waste, or free liquids.

Information about City of Birmingham landfill requirements can be obtained from Eastern Area Landfill at 655-3391.

Copies of ADEM regulations and information about regulated hazardous waste, infectious waste, or free liquids disposal may be obtained by contacting ADEM at (334) 271-7700.
